SIDE DISH

### Ingredients

- 6 egg yolks
- 3 tablespoons peppermint schnapps
- 5 peppermint candies hard crushed
- 5 servings garnishes: raspberries fresh
- 0.5 cup sugar
- 1 teaspoon vanilla extract
- 2 cups whipping cream

### Equipment

- frying pan
- baking sheet
- ladle
- oven
- knife
- whisk
- wire rack
- roasting pan
- broiler

## Directions

- Combine first 5 ingredients, stirring with a wire whisk until sugar dissolves and mixture is smooth.
- Pour mixture evenly into 5 (5- x 1-inch) round individual baking dishes; place dishes in a large roasting pan or a 15- x 10- x 1-inch jellyroll pan. Prepare 1/2-inch water bath (see Brle Basics below).
- Bake at 275 for 50 minutes or until almost set. Cool custards in water in pan on a wire rack.
- Remove from pan; cover and refrigerate 8 hours or overnight.
- Sprinkle crushed peppermint candies evenly over each custard; place custards in jellyroll pan.
- Broil 5 inches from heat (with electric oven door partially opened) until candies melt.
- Let stand 5 minutes to allow melted candies to harden.
- Garnish, if desired.
- Note: Baking time is for 5- x 1-inch round individual baking dishes. As a general rule, to use 4-, 6-, or 8-ounce custard cups, bake for an additional 15 to 20 minutes. When the crme brle is done, the center will still be slightly liquid and a knife will not come out clean. The yield will vary with different size dishes: For 4-ounce cups you'll get 10 servings, for 6-ounce cups you'll get 7 servings, and for 8-ounce cups you'll get 4 servings.
- Don't panic when you see the term water bath. A water bath is simply a roasting pan or jellyroll pan filled with water. The water creates a cushion from the heat of the oven, allowing the custards to bake slowly without curdling.

- Don't burn yourself. Before you take the water bath out of the oven, remove some of the water with a basting bulb or a long-handled ladle.
- When you broil the brown sugar, get the crme brles as close to the heating element as possible. To do this, place an inverted roasting pan on the top shelf of the oven; then place the crme brles on a baking sheet on top of the roasting pan.
- An adventurous alternative to the broiler is a welding torch. Your dinner guests will think you have gone mad, but the torch gives the ultimate glassy crust. Torching is the professional chef's method of choice.
- Place the custards in a roasting pan filled with ice, and then broil them. The ice keeps the custards cold while the sugar melts.
- You can bake the crme brles ahead of time, but wait until just a few minutes before serving to caramelize the sugar. The caramelized sugar will begin to liquefy if the custards sit for more than an hour.
- We found that Dixie Crystals brand brown sugar works best for crme brles. It caramelizes evenly to a perfect golden brown.
- Don't waste your money on salamanders sold in gourmet catalogs and used for caramelizing the top of crme brles. They work like branding irons to melt the brown sugar. When we tried one, we ended up with burnt--not caramelized--sugar.
