Ingredients

- 3 large eggs
- 2.3 cups cup heavy whipping cream divided
- 0.5 teaspoon sea salt
- 1.3 cups sugar divided
- 0.5 teaspoon vanilla extract pure
- 1 cup milk whole

Equipment

- bowl

- frying pan
- sauce pan
- whisk
- sieve
- wooden spoon
- kitchen thermometer
- ice cream machine

Directions

- Heat 1 cup sugar in a dry 10-inch heavy skillet over medium heat, stirring with a fork to heat sugar evenly, until it starts to melt, then stop stirring and cook, swirling skillet occasionally so sugar melts evenly, until it is dark amber.
- Add 1 1/4 cups cream (mixture will spatter) and cook, stirring, until all of caramel has dissolved.
- Transfer to a bowl and stir in sea salt and vanilla. Cool to room temperature.
- Meanwhile, bring milk, remaining cup cream, and remaining 1/4 cup sugar just to a boil in a small heavy saucepan, stirring occasionally.
- Lightly whisk eggs in a medium bowl, then add half of hot milk mixture in a slow stream, whisking constantly.
- Pour back into saucepan and cook over medium heat, stirring constantly with a wooden spoon, until custard coats back of spoon and registers 170°F on an instant-read thermometer (do not let boil).
- Pour custard through a fine-mesh sieve into a large bowl, then stir in cooled caramel.
- Chill custard, stirring occasionally, until very cold, 3 to 6 hours. Freeze custard in ice cream maker (it will still be quite soft), then transfer to an airtight container and put in freezer to firm up.
- Ice cream keeps 1 week.
